Moderna kuhinja nezamisliva je bez šanka, otoka ili blagovaonskog stola integriranog sa kuhinjom. On treba biti vizualno dominantan - razведен prema dnevnom boravku i funkcionalan na radnoj površini. Prirodan izgled i ekologija su najizražaniji trend ove sezone u svijetu kuhinja. To znači da struktura drveta, prirodnog ili u imitaciji mora biti prisutna na frontama, radnim pločama ili korpusima kuhinje. Ukoliko se odlučite za dominaciju drveta u kuhinji, svakako uvedite detalje u bojanom staklu ili lakiranom MDF-u u mat verziji. Uvodjenjem detalja u drugim materijalima naglasiti ćete ljepotu drveta i izbjegći monotoniјu samo jednog materijala.

Modern kitchen cannot be conceived without a bar counter, an island or a dining table that are integrated in the kitchen. It has to be visually dominant – extended towards the living room area and functional on the countertop. Natural look and ecology are this season's most prominent trends in the world of kitchens. It means that the wood texture, whether natural or faux, must be present in the kitchen fronts, countertops or cabinets. Should you decide on the prevalence of wood in the kitchen, by all means do introduce details in stained glass or glazed MDF in matt finish. By introducing details in other materials you will accentuate the beauty of wood texture and avoid monotony of having only one material.

Ove kuhinje su uglavnom izvedene od bojenog medijapanata (MDF-a) jer univer je vrlo teško ovako saviti.

Iako teže i skuplje za izvođenje, kuhinje bez oštirih ivica su vrlo popularne i tražene. Kombinacijom umjetnih i prirodnih materijala, te paletom prirodnih boja od žarkih, pa sve do neutralnih tonova možete kombinirati i dobiti kuhinju baš kakvu ste zamisili.

Boje koje su trenutni hit u modernim kuhinjama možete naći od žarkih pa sve do neutralnih tonova. Najčešće boje koje su trenutno zastupljene pri izboru kuhinja su crvena, narandžasta, tirkizna, smaragdno zelena, crna, srebrna, krem i bijela. Dvije do četiri ove boje se najčešće kombiniraju, bilo da se radi o boji zidova, bilo o frontama kuhinjskih elemenata ili podu.

These kitchens are mainly produced from painted MDF because light-weight board is very difficult to bend this way. Although they are more difficult and more expensive to make, the kitchens without sharp edges are very popular and in demand. Combining faux and natural materials and colour palettes ranging from natural and intense all the way to neutral tones, you can get the kitchen you have dreamed of. The colours of the moment found in modern kitchens range from intense to neutral tones. The colours that prevail when selecting kitchens are red, orange, turquoise, emerald green, black, silver, off-white and white. Most frequent are the combinations of two, three or four of these colours, whether in the colour of the walls, or the kitchen unit fronts or the floor.

Kućni šank odavno više ne predstavlja luksuz u uređenju interijera, nego je postao praktičan način povezivanja različitih prostorija u manjim stanovima.

Povezivanje kuhinje i dnevnog boravka u jedinstveni, veliki otvoreni prostor danas je gotovo pravilo u gradnji stambenih zgrada, a šank se tu pokazao kao element koji može imati više funkcija te ujedno izgledati lijepo i zanimljivo. Nekad je osnovna funkcija šanka bila da se na njemu gostima služe alkoholna pića. Današnji kućni šank je više kombinacija stola i radne plohe u kuhinji. U tijelo šanca-kuhinjskog otoka može se ugraditi staklena vitrina za čuvanje posuđa.

Home bar no longer represents a luxury in the interior decorating; it has become a practical way of linking various rooms in smaller apartments. These days, linking the kitchen and the living room into a single large open space has almost become a rule when constructing apartment buildings and home bar turned out to be a feature that can have many functions and yet look nice and interesting. In the old days, the main function of the bar counter was to serve alcoholic beverages to the guests. Present-day home bar is a dining table/countertop combination in the kitchen. A glass cabinet for keeping dishes can be installed in the body of the home bar-kitchen island.
